COMMUNITY SOLAR PROGRAM INFORMATIONAL MEETING

The Village of Pittsford Comprehensive Plan addresses sustainability and contains recommendations intended to facilitate the transition to green power generation.

As part of a multifaceted effort to implement the Plan's sustainability goals, the Village Board is partnering with Monroe Community Power to offer a renewable energy program in the Village. Participation in the program will provide guaranteed savings through the utilization of community solar power. Residents who participate in the program will be able to save money on their energy bill through solar bill credits and will also support the generation of clean energy.

Monroe Community Power sent a letter a few weeks ago that outlined details of this program and provided notice of an informational virtual Zoom meeting on December 16th, 2020. That letter did not arrive on-time, in part because of backups with bulk mail processing at the Post Office. The December informational meeting on Pittsford's community solar program was recorded and may be viewed at monroecommunitypower.com/events.

A second virtual informational meeting for Pittsford's community solar program is being held on Thursday, February 15th, 2021 at 6:00 PM. If you are interested, please RSVP and get the virtual meeting details at www.bit.ly/solar-v-pittsford-021. The meeting will be recorded and posted on the Monroe Community Power website.

By participating in the Village's Community Solar Program you will be able to save up to 10% in electricity costs on your RG&E bill. The program will also help the Village achieve its environmental goals toward becoming a truly sustainable community. For every enrollment, the program administrator, Joule Community Power, will contribute \$50 toward improvements to the recently created Village Arboretum.

Community Solar represents the next step in Pittsford's historic commitment to a healthy and sustainable environment. Speaking on behalf of the Village Board, I am pleased to be able to offer you the opportunity to participate in this program.

If you have any questions about the program, please contact our partners at [Roctricity](#) during normal business hours at (585) 244-0244.
